

Seonggyu Park

Assistant Research **Scientist**

Curriculum Vita

My primary focus is on developing hydrologic models to identify challenges in present and future water resources management. I am particularly interested in assessing spatial-temporal patterns of interactions between groundwater and surface water, improving water quality and sanitation in developing countries with severe water shortages, and developing new water conservation technologies regarding water catchment and harvesting systems. I am also a strong proponent of open and reproducible workflows.

Education

- 2014 – 2018 Ph.D. in Groundwater Engineering, Department of Civil & Environmental Engineering. Colorado State University, Fort Collins, CO, United States
Dissertation: [Dissertation: Enhancement of Coupled Surface/Subsurface Flow Models in Watersheds: Analysis, Model Development, Optimization, and User Accessibility.](#)
- 2004 – 2006 M.E. in Environmental Engineering. University of Suwon, Suwon, South Korea
Thesis: A study on Adsorption Characteristics of VOCs on Activated Carbon.
- 1998 – 2004 B.E. in Environmental Engineering. University of Suwon, Suwon, South Korea

Brief professional history

- Apr. 2021 – **Assistant Research Scientist**, Texas A&M AgriLife Research, Temple, TX, United States
- 2018 – 2021 **Postdoctoral Research Associate**, Texas A&M AgriLife Research, Temple, TX, United States
- 2015 – 2018 **Graduate Research Assistant**, [Ryan Bailey's Lab](#) in Dept. of Civil Engineering, Colorado State University, Fort Collins, CO, United States
- 2011 – 2012 **IT & Computer Instructor**, Intercultural Institute of California (IIC), San Francisco, CA, United States
- 2006 – 2014 **Researcher**, HWASHIN Engineering & Bio Technology Co., Ltd., Incheon, South Korea

Research Experience

Icons link to additional content

I actively contribute to developing and enhancing hydrological models and software, engaging with the model and Python [communities](#). I maintain and support these tools, and below is an overview of my authored and contributed packages, along with interactive data applications.

Model Applications

- Provide technical support by developing the SWAT-MODFLOW model for the Yongsan River watershed in South Korea and conducting uncertainty analysis, (2024 – current). [SWAT-MODFLOW](#), [PEST](#), [swatmf](#)
- Conducted uncertainty analysis on SWATp-Paddy models for the Osu watershed in South Korea and the Albufera region in Spain, (2024 – 2024). [SWAT+](#), [PEST](#), [swatp](#)
- Analyzed spatio-temporal dynamics of groundwater-surface water interactions in the Koksilah River Watershed utilizing the SWAT-MODFLOW model and swatmf optimization framework, (2024 – 2024). [SWAT-MODFLOW](#), [PEST](#), [swatmf](#)
- Assessed Spatio-Temporal Patterns of Groundwater - Surface Water Interactions and Solute Transports in the Colorado River Basin using coupled APEX-MODFLOW Model, (2020 – 2023). [AMRS](#), [PEST](#)
- Assessed Water, Salt, Fire and Land Mangement in the Colorado River Basin using APEX, (2020 – 2023). [APEX](#)
- Developed modelling frameworks for parameter estimation, sensitivity and uncertainty analysis on integrated hydrological models, (2020 – 2022). [Python](#), [PEST](#)
- Developed SWAT-MODFLOW model to support resilient development and return on investment analyses in the Cubango-Okavango River Basin (CORB), (2020 – 2022). [SWAT-MODFLOW](#), [PEST](#)
- Provided technical supports by developing database, framework, and analysis tools for the Real-Time Conservation Effects and Assessment Project (CEAP) - National Modelling provided by United States Department of Agriculture (USDA), (2018 – 2019). [SWAT+](#), [Python](#)
- Assessed Surface Water and Groundwater Resources in the Middle Bosque, Texas Watershed using the coupled SWAT-MODFLOW model, (2017 – 2018). [SWAT-MODFLOW](#), [PEST](#)
- Conducted research on spatial integration of SWAT and MODFLOW and optimizing the model with Spatio-temporal variation, (2017 – 2018). [SWAT-MODFLOW](#), [PEST](#)
- Developed groundwater models with MODFLOW for several watersheds (Middle Bosque in Texas, United States, Missouri, Deer Creek in Missouri, United States, Neishaboor, Iran, and Limpopo, Southern Africa), (2015 – 2018). [MODFLOW](#)

Model Development

6. **Park, S.**, and Jeong, J. (2024—current). [swatp-ghg](#): Develop a Carbon dynamics model for predicting GHG emission and sequestration in croplands [Fortran](#), [Python](#)
5. Jeong, J., Arnold, J., and **Park, S.** (2023—current). [swatp-paddy](#): Develop a Rice paddy module in SWAT+ for simulating paddy rice cultivation and irrigation management in agricultural watersheds [Fortran](#)
4. **Park, S.**, Jeong, J., Hong, Y., and Bailey, R. (2024). [swatmf-Hg](#): Developed a Mercury dynamics module for assessing spatial and temporal variability of Mercury transport in watersheds [Fortran](#)
3. Bailey, R., Jeong, J. and **Park, S.** (2023). [apex-mf \(ARMS\)](#): Contributed to the development of a new integrated model to simulate hydrological processes in watershed systems [Fortran](#)
2. Bailey, R. and **Park, S.** (2020). [swatp-mf](#): Contributed to enhancing SWAT+ simulation of groundwater flow and groundwater-surface water interactions using MODFLOW routines [Fortran](#)
1. Bailey, R and **Park, S.** (2017). [swat-mf](#): Contributed to enhancing SWAT-MODFLOW [Fortran](#)

Software Development

7. **Park, S.** (2024—current). [ghgpy](#): Develop a GHG emission dynamics module for predicting GHG emission and sequestration in croplands [Python](#)
6. **Park, S.** (2023—current). [apexmf](#): python modules for AMRS model parameter estimation and uncertainty analysis [Python](#) [doi](#) [10.5281/zenodo.6000645](https://doi.org/10.5281/zenodo.6000645)
5. **Park, S.** (2021—current). [swatmf](#): python modules for SWAT-MODFLOW model parameter estimation and uncertainty analysis [Python](#) [doi](#) [10.5281/zenodo.6000645](https://doi.org/10.5281/zenodo.6000645)
4. **Park, S.** (2023). [DayCentPy](#): Developed Python code for optimizing the DAYCENT model using the Bayesian method with the Differential Evolution Adaptive Metropolis (DREAM) algorithm [Python](#)
3. Jeong J and **Park, S.** (2023). [APEX-CUT](#): Contributed to the development of APEX model optimization tool [Python](#), [QT](#)
2. **Park, S.** (2023). [APEXMOD](#): Developed a graphical user interface, a workflow implemented in QGIS, for application and evaluation of APEX-MODFLOW models [Python](#), [QT](#), [QGIS](#)
1. **Park, S.** (2019). [QSWATMOD](#): Developed a graphical user interface, a workflow implemented (as a plugin) in QGIS, for application and evaluation of SWAT-MODFLOW models [Python](#), [QT](#), [QGIS](#)

Web applications

5. Celray, J and Park, S (2024—current). Develop the CoSWAT framework to advance global crop ecosystem and hydrological analysis [Python](#), [SWAT+](#)
4. Park, S. (2023). Developed a web application for visualizing and analyzing Colorado River Basin (CRB) APEX-MODFLOW model performance [Python](#)
3. Park, S (2021). Developed a web application for visualizing and analyzing APEX simulation results [Python](#)
2. Park, S (2021). Developed a web application for visualizing and analyzing Biomass in grazing lands [Python](#)
1. Park, S. (2019). Developed a visualization tool for National SWAT+ model assessments [SWAT+](#), [Python](#)

Under review

1. Development of a Novel Water Quality Index Considering Impacts of Natural and Anthropogenic Hazards using APEX-MODFLOW. January 2023 to December 2025. *Environmental Protection Agency (EPA), United States* . Proposed budget: \$734,219. **Role:** Co-PI. PI: Jaehak Jeong. FTE: 0.50.

Current projects

1. Soil Health Demonstrations to Increase Regenerative Agricultural Intensification in Southern High Plains. September 2024 to September 2029. *USDA-Natural Resources Conservation Services* . Proposed budget: \$4,999,387. **Role:** Co-PI. PI: Joseph Burke. FTE: 0.20.
2. Climate-Smart Agricultural Water Resource Adaptation Platform. November 2023 to December 2025. *Rural Development Administration of the Republic of Korea* . Total budget: \$540,000. **Role:** Co-PI. PI: Jaehak Jeong. FTE: 0.50 to 1.00 across project years.
3. Development of Catchment-scale Computational Model for Assessing Climate Change Impact and Risks on Water Environment in Agriculture. January 2023 to December 2025. *Rural Development Administration (RDA), Korea* . Total budget: \$540,000. **Role:** Co-PI. PI: Jaehak Jeong. FTE: 0.30 to 0.50 across project years.

Completed projects

1. Koksilah SWAT-MODFLOW model optimization. November 2023 to March 2024. *University of Victoria, Canada* . Total budget: \$20,000. **Role:** PI. PI: Seonggyu Park. FTE: 0.70 to 1.00 across project years.
2. Assessment of Water, Salt, Fire and Land Management in Colorado River Basin using APEX. May 2017 to August 2023. *Bureau of Land Management (BLM), United States* . Total budget: \$2,404,036. **Role:** Assistant Research Scientist. PI: Jaehak Jeong. FTE: 1.00.
3. Development of DayCent Optimization framework with the Differential Evolution Adaptive Metropolis (DREAM) algorithm. January 2023 to March 2023. *Agoro Carbon Alliance, United States* . Total budget: \$25,000. **Role:** Co-PI. PI: Jaehak Jeong. FTE: 0.10 to 0.50 across project years.
4. SWAT-MODFLOW modeling to support resilient development and return on investment analyses in the Cubango-Okavango River Basin (CORB). April 2020 to April 2021. *The Nature Conservancy (TNC), United States* . Total budget: \$30,000. **Role:** Co-PI. PI: Jaehak Jeong. FTE: 0.10 to 0.50 across project years.

Professional Service

Workshops delivered

10. Integrated Hydrological Modeling Practices and Uncertainty Analysis, number of attendees: 34, (July 24-26, 2024). *Korea Institute of Geoscience and Mineral Resources*, Daejeon, South Korea.
9. ArcAPEX for Agricultural Watershed Modeling Workshop | Uncertainty Analysis (4th Day), number of attendees: 8, (April 18-21, 2023). *Blackland Research and Extension Center, Temple, TX*, Virtual.
8. SWAT-MODFLOW Workshop, number of attendees: 6, (Jul. 27-29, 2022). *Korea Institute of Civil Engineering and Building Technology*, Goyang, South Korea.
7. SWAT-MODFLOW / QSWATMOD, number of attendees: 15, (May 6, 2022). *Ulsan National Institute of Science and Technology (UNIST)*, Ulsan, South Korea.
6. ArcAPEX for Agricultural Watershed Modeling Workshop | APEX-MODFLOW (3rd Day), number of attendees: 39, (Mar. 16-18, 2022). *Blackland Research and Extension Center, Temple, TX*, Virtual.
5. Salinity Modeling Workshop (3 hours-session), number of attendees: 20, (Jan. 26, 2022). *Blackland Research and Extension Center, Temple, TX*, Virtual.
4. SWAT-MODFLOW / QSWATMOD with Dr. Ryan Bailey, number of attendees: 11, (Jul. 15-16, 2019). *2019 International SWAT Conference*, Vienna, Austria.
3. SWAT-MODFLOW / QSWATMOD with Dr. Ryan Bailey, number of attendees: 20, (Sep. 17-18, 2018). *2018 International SWAT Conference*, Brussels, Belgium.
2. Introduction to QSWATMOD, number of attendees: 20, (Jun. 24, 2018). *9th International Congress on Environmental Modelling & Software*, Fort Collins, CO, United States.
1. Introduction to SWAT-MODFLOW / Model Optimization with PEST, number of attendees: 7, (Nov. 16, 2017). *Aarhus University*, Aarhus, Denmark.

Invited talks

8. Reproducible framework for model calibration and uncertainty analysis, (Jan. 9, 2025). *Texas A&M AgriLife Research*, Temple, TX, United States.
7. Foundational Approaches to Predicting Carbon Dynamics and Greenhouse Gas Emissions in Cropland Ecosystems, (Jul. 18, 2024). *National Institute of Agricultural Sciences (NAS)*, Wanju-gun, South Korea.

6. Introduction to modeling practices for predicting Carbon dynamics and GHG emissions in croplands, (Jun. 19, 2024). *USDA Agricultural Research Service*, Jonesboro, AK, United States.
5. Uncertainty Quantification of Nitrate Transport Simulation for Integrated Hydrological Models, (Jun. 30, 2023). *National Institute of Agricultural Sciences (NAS)*, Wanju-gun, South Korea.
4. Assessment of spatio-temporal variation of water resource and fluxes using integrated models, (Jun. 23, 2022). *2022 UST Global Mentoring Conference*, Virtual.
3. Overview of SWAT / SWAT+, (May 4, 2022). *National Academy of Agricultural Sciences*, Wanju-gun, South Korea.
2. Fundamentals of Hydrogeology and Model Applications, (Apr. 28, 2022). *Dankook University*, Cheonan, South Korea.
1. Introduction to the SWAT-MODFLOW model, (Aug. 11, 2016). *Ulsan National Institute of Science and Technology (UNIST)*, Ulsan, South Korea.

Graduate Student Committee Involvement

- | | |
|---------------|---|
| Spring 2025 — | Co-promotor , Master program in Water and Climate Department, Vrije Universiteit Brussel, Brussel, Belgium |
| Fall 2024 — | Committee member , Kangwei Shin from China, Master program in Civil & Environmental Engineering, Hanbat National University, Chair: Jin Chul Joo, Daejeon, South Korea |
| Fall 2024 — | Committee member , Suryeon Kim from China, Master program in Civil & Environmental Engineering, Hanbat National University, Chair: Jin Chul Joo, Daejeon, South Korea |
| Fall 2023 — | Committee member , Ali Akram Niazi from Pakistan, Ph.D program in Water Management & Hydrological Science (WMHS), Texas A&M University, Chair: Huilin Gao (WMHS), College Station, Texas, United States |

Related experience

- Provided in-depth instruction on 2D and 3D groundwater flow modeling in Groundwater Engineering (CIVE423), covering model construction using tools like Excel, Text Editor, and ModelMuse, while bridging theoretical concepts with practical applications to help students translate conceptual models into computational frameworks. (2018 — 2018). **MODFLOW**

- Developed and implemented lesson plans encompassing software programs such as Excel, Word, Access, Outlook, and PowerPoint through hands-on demonstrations and personalized support. (2011 – 2012).
- Provided undergraduate students with a broad introduction into 2-dimensional and 3-dimensional Computer-Aided Design (CAD) with a focus on construction and architecture-specific applications including environmental infrastructure. (2004 – 2006). *AutoCAD*
- Taught an industry-leading CAD software program (Autodesk AutoCAD) to model construction projects and then create and distribute basic, industry-standard architectural drawings. (2004 – 2006). *AutoCAD*

Journal issues edited

2022 – 2023 **Guest editor**, [Special Issue “Impact of Climate Change on Watershed Hydrology: Latest Advances and Prospects”](#), Sustainability

Fellowships & Awards

3. Whitney Borland Scholarship, Colorado State University, \$5000, (2017).
